Claims 48- 51, 53- 57 are pending in this application.

Oath/Declaration

The oath/declaration filed on 10/15/2003 is acceptable.

Specification

The specification is objected to for the following reason:

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed (see MPEP § 606.01).

A new abstract is required that is clearly indicative the invention to which the claims are directed.

Note that, the claims are directed to a method of making a semiconductor device instead of to a semiconductor device.

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the

unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Set of Claims 48- 51 and 53- 54 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over **claims 1 and 3 of Patent No. 6,558,968 B1**. Although the conflicting claims are not identical, they are not patentably distinct from each other because **it would have been obvious to one of ordinary skill in the art at the time of the invention was made to etch protective layer to expose the flat cathode emission surface by applying a protective layer over the flat**

cathode layer (claim 3) before the step of exposing the flat cathode layer **in order to** define inventive Method for creating an emitter having a flat cathode emission surface.

Set of Claims 55- 57 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over **claims 1 and 3 of Patent No. 6,558,968 B1**. Although the conflicting claims are not identical, they are not patentably distinct from each other because **it would have been obvious to one of ordinary skill in the art at the time of the invention was made to** etch protective layer to expose the flat cathode layer **by** applying a protective layer over the flat cathode layer (claim 3) before the step of exposing the flat cathode layer **in order to** define inventive Method for creating flat tunneling emitter on an electron supply.

When responding to the office action, Applicants' are advice to provide the examiner with the line numbers and page numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.

A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the day of this letter. Failure to respond within the period for response will cause the application to become abandoned (see M.P.E.P 710.02(b)).
